

PREMIUM COLLAGEN HYDROLYSATE

Bovine Collagen PeptidesQuality for easy processing

Nutraceuticals • **Nutricosmetics** • Food Supplements

- Highly soluble even in cold water
- Free-flowing, dust-free powder
- From gently produced, ultrapure collagen
- Neutral odor and taste
- Halal-certified

Bovine Collagen Peptides -Quality for Easy Processing

Health food applications

Building on more than 85 years of experience with collagen production, Viscofan BioEngineering has developed a collagen hydrolysate of exceptional quality for the health food industry.

We offer bovine collagen peptides at industrialscale for a broad variety of applications as nutraceuticals, nutricosmetics or food supplements.

Nutraceuticals Nutricosmetics Food Supplements

Advanced technology for superior hydrolysate

Starting with very pure collagen type I from bovine skin, our in-house manufacturing covers the entire workflow from raw material to the ready-to-use product.

We use a proprietary technology for gentle thermal conversion of collagen to gelatin. Subsequently, quality collagen peptides with an optimal bioavailability profile and a per se low allergy potential are generated enzymatically.

An advanced drying technology generates the agglomerated hydrolysate powder that stands out with its optimized quality for easy processing: the dust-free formula provides excellent free-flowing properties and is quickly soluble even in cold water.

Tailored service

Our premium collagen hydrolysate is available at a competitive price. We offer attractive delivery times and professional expert customer support. Test COLLinstant® and request a product sample today!

FEATURES Quickly cold-water-

- soluble · Dust-free, free-flowing
- powder
- Defined particle sizes
- Peptides with mean MW of 1000-3000 Da
- · Raw material from traceable sources, GMO-free
- Ultrapure bovine collagen hydrolysate
- Controlled quality

- **BENEFITS**
- Optimal solo or in composition as instant powder for health drinks
- Excellent dispensing & dosing properties
- · High stability, long shelf-life
- Optimal bioavailability
- Good digestibility
- Safe for food purposes
- Neutral odor & taste
- Per se low allergy potential
- ISO 9001:2008-certified
- Halal-certified
