

Liposovit[®]-D₃ *vegan*

Powder, **vegan** liposomal vitamin D₃

Thanks to our novelty technology solution – the encapsulation of vegan cholecalciferol in liposomes and dehydration of those particles – we have obtained the product with unique technological and biological properties. In comparison with traditional forms of Vitamin D₃, **Liposovit[®]-D₃ VEGAN** has increased absorption capacities and higher bioavailability. Thanks to this more effective supplementation, our state-of-the-art and fully biocompatible product will effectively support the proper functioning of the body.

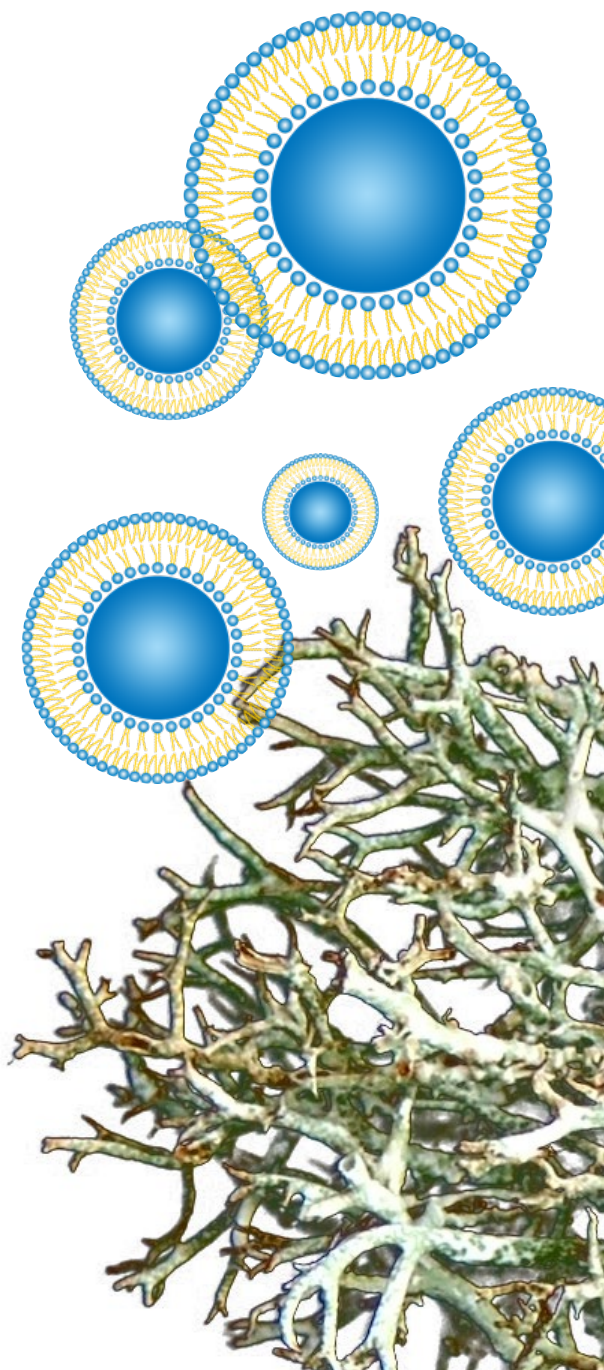

Advantages of Liposovit[®]-D₃ *vegan*

- cholecalciferol, entirely of vegan origin
- no ingredients of animal origin
- better absorbability and higher bioavailability in comparison with the active substance in its traditional form
- powder form to ensure high storage stability, to facilitate encapsulation and use in powder mixtures.

Application

- food supplements.
