

Liposovit[®]-Mg

DIRECT

Granulated liposomal magnesium

Liposovit[®]-Mg DIRECT is a granulated form of liposomal magnesium, combining the advantages of lipid nanocarriers of active substances and the benefits of granules. Consequently, it makes it possible to significantly improve the effectiveness of magnesium supplementation in fast-dissolving products and/or formulas intended for direct consumption.

Liposovit[®]-Mg DIRECT contributes to normal functioning of the nervous system and muscles, as well as maintaining normal psychological functions, normal bones, teeth and electrolyte balance. It also contributes to reducing feelings of tiredness and fatigue, and normal energy-yielding metabolism.

Advantages of Liposovit[®]-Mg DIRECT

- easier and faster dissolution
- increased flowability
- reduced product dusting
- lower hygroscopicity
- convenient dispensing

Application:

- dietary supplements in sachets
- direct use
- effervescent tablets

A close-up photograph of a person's hand holding a single, round, white tablet between their thumb and index finger. The hand is positioned over a clear glass filled with water. The background is softly blurred, showing a white mesh strainer or filter over the glass.
